

glass like you've never seen it before

Whether internal or external glass walls or displays, the unique incorporation of white in the design and print process delivers the most outstanding, high impact graphics giving the impression of direct to glass printing without the inherent cost and longer term problems of direct print.

performance data

visible light transmission (MLT)	84.4%
visible light reflection (VLR)	7.9%
glare reduction	1%
heat gain reduction	1%
shading coefficient (TSER)	.96
UV reduction (300-380 nm)	99%
total solar energy reduction (TSER)	15%
thickness	2 mil / 50 micron
tack/adhesive	high/NPL
chemical resistance	good

key features

- full colour graphics, including white on glass (CMYKW)
- excellent optical clarity
- removes ultra violet light, reducing fading of fabrics, furnishing and interiors
- transforms architectural glass to vibrant advertising, design and corporate identity opportunities.

Product Application: This film should only be installed by an approved digiglass installer. Specific procedures have to be followed.

Warranty: 5 years (conditions apply)

Please refer to the Film to Glass checklist to ensure films' suitability to the glass.

Performance results are subject to variations within industry standards and are only intended for estimating purposes.

Performance data is based upon film prior to printing.
