

# digiwall™

## application method

### Adhesive:

Generally Tekfix 65, though depends on substrate.

### Hanging:

- Damp paper backing and allow to soak for 10 minutes.  
Apply adhesive to wall surface.
- Carefully smooth wallcovering onto wall surface using a spatula, allowing 5-10 cm at top and bottom for trimming.
- Overlap lengths and double cut through, using a seam roller to ensure product is well bonded at the join.
- Remove any adhesive seepage immediately with detergent solution and clean water. Rinse thoroughly.
- Each alternate length should be reverse hung with the exception of Ridge which should not be reversed.
